

OUR NEW RIVER HOTEL IS READY

On December 11th 2007 we celebrated the opening of our new River Hotel and the 70th anniversary of our hotel operation. Our new River Hotel has 16 high quality double rooms.

The River Hotel architecture has been inspired by our original hotel's Lapp cottage (1937). The new building is situated in traditional Inari pine forest on the bank of Juutua River.

The rooms are decorated with quality materials in simple but cosy Scandinavian style. Each room has own sauna, a drying cupboard, digital tv, broadband, fridge and kettle. Windows face River Juutua and you can enjoy the view as well as midnight sun in the summer and northern lights in the winter from your own balcony / patio.

One of the rooms is equipped for disabled and therefore without a sauna.

The starting point in the design of the building has been the surrounding nature. Guests have access to cross country skiing tracks and walking paths from their doorstep. The surrounding forest and river scenery has inspired the interior design as well. Our main building with reception and restaurant services is one minute's walk away.
